- Real-Time / Batch Mode Verification
- Automatic Reconciliation
- End of Day Procedures
- Card Transaction Reports
- Level 2 and Level 3 Verification
- Multiple Payment Gateways
- Merchant Account Services
- ACH, eCheck, and More!

Credit Card Advantage

The First PA-DSS Certified Credit Card Software for MS Dynamics GP

With growing concern over the increasing quantities of incidents involving a massive volume of compromised credit card numbers and sensitive information, **the payment industry security standards council has adopted Visa's PABP security initiatives, and mandated that all credit card processing software MUST meet PA-DSS standards to guard against cyber data thefts.** As of Oct. 1, 2008, Visa would NOT allow their acquirers (the financial institutions who provide merchant account service) to sign up merchant accounts for companies who use payment applications that are NOT in compliance with these security standards.

http://usa.visa.com/download/merchants/payment_application_security_mandates.pdf

With few, if any, certified encryption software applications in the marketplace, be wary of other vendors' claims of 'secure' software. As a leader for electronic payment applications, Nodus is always in front of the Microsoft Dynamics market with the most secure credit card processing application. CCA-DSS is the first PA-DSS certified integrated payment solution for Dynamics GP.

CCA-DSS enables merchants to meet PCI compliance. It allows them to benefit from productivity improvement resulting from integrated payment functions with accounting systems. In addition, through Nodus, customers can receive a merchant account at more competitive rates.

Speed and Simplify Credit Card Processing for Microsoft Dynamics GP

Companies today need a fast, secure, and reliable system for accepting credit cards. Nodus' Credit Card Advantage offers faster approval times and automatic data transfer to your accounting solution that increases productivity, reduce overhead, and streamline business operations allowing your company to achieve Rapid ROI.

This solution goes beyond just standard credit card processing. Tight integration with multiple payment gateways, processors, and back office environments delivers flexible, reliable services from the first transaction on. Credit Card Advantage is simply the most powerful and secure electronic payment solution in its class!

Add More Functionality to Your E-Payment Solution

Credit Card Advantage gives you the power and flexibility to add more functionality to your accounting solution. With our optional E-Commerce, Retail, and Online Bill Payment solutions you will empower your employees and your business.

- Enhance Microsoft Dynamics GP security for storage of credit card information with optional integrated Credit Card Encryption.
- Gain flexibility to add E-Commerce and Online Bill Pay options

For many companies, handling invoices is still an old-fashion paper process despite the fact that customers' experience is becoming more web-based everyday. By using Nodus' ePay Advantage with Credit Card Advantage, Microsoft Dynamics GP users can send invoices electronically to their customers and allow them to pay through a secured payment site at their convenience.

One-Stop Shop for Payment Processing Software and Services

Aside from providing our acclaimed Credit Card Advantage for processing credit card and electronic check payments within Microsoft Dynamics GP, Nodus provides payment gateway, merchant account and electronic check services. Nodus is the only vendor that can provide a single point of contact for both software and electronic payments support and services.

PCI Compliance: Encryption, Assessment and Security Scanning

Nodus also provides the only commercially available Credit Card Encryption solution which features advanced 256-bit key encryption for those companies who store credit card information in the Microsoft Dynamics GP Customer Card file. All credit card numbers are masked down to the last 4 digits, meeting the strictest state and government requirements. In addition, Nodus offers a PCI self-assessment questionnaire, as well as quarterly security scanning to meet full PCI Compliance.

CUSTOMER SUCCESS STORIES

"Using Nodus' Credit Card Advantage, we've migrated to a paperless office. This powerful solution simplifies the way we process credit cards and enables us to book transactions and pre-authorize payments, effectively minimizing our exposure on COD orders."

- Tina Lemanowicz, eBlueprint.com
