Retail Advantage for Microsoft Dynamics GP

Helping you make the right choices.

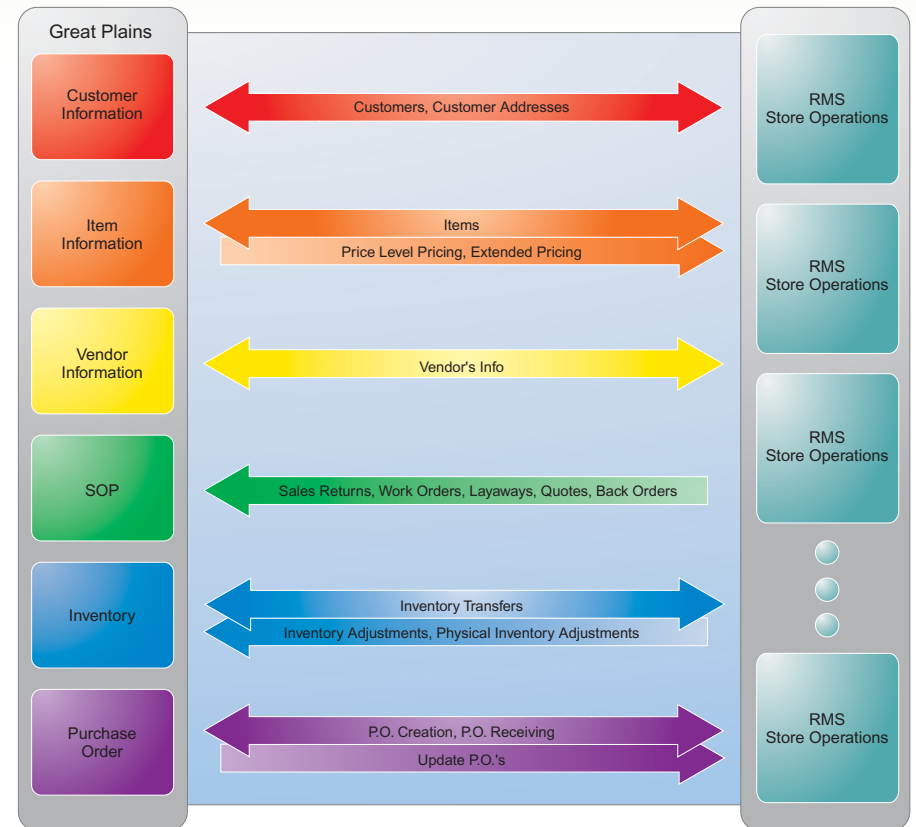

Retail Advantage employs a unique approach to connect and map the RMS Store Operations database at the store level directly to the Dynamics GP company database. Based on early beta and industry feedback, this approach provides a powerful integration solution for Microsoft RMS and POS users who would like to manage their retail stores with Microsoft Dynamics GP to provide real time operation information. This newest application provides many advanced functionalities including:

- Support for both standard price level pricing and the Extended Pricing modules
- The ability to map either price levels or price sheets to the four price levels available in RMS
- Processing inventory transfers from store to store
- Processing inventory transfers between central warehouse and store(s)
- Tracking transfers in-transit
- The flexibility to choose how to record transaction payments and/or payments on account
- Support for both global and non-global customers
- The choice of B2B or B2C customer mapping
- Bi-directional integration
- And much, much more...

Schedule a private demo to see the power of Retail Advantage in action!
